School of Computer Science & Informatics, Cardiff University

Employer's Evaluation of Progress – Academic Year 2023/24 – 1st Visit Review

Student Name:	**Yan Tung Lam**
Employer:	**IDBS**
Placement Supervisor's Name:	**Kemal Yilmaz**
Supervisor's position:	**Engineering Manager**
Date:	

The questions relate to the student's progress in the current review period:

Are you satisfied with the student's progress in this review period? Yes
(Please delete as appropriate)

Please comment on the student's overall performance and on how well you feel the student is carrying out their objectives/tasks:

Yan has learnt both the ways of working and the technical understanding of the tools, technologies and the IDBS software being developed.

She actively participates in meetings and proactively asks if something is unclear as well as takes initiative to find things out herself.

She is conscientious in her work.

In summary, Yan is exceeding expectations for a placement student at this stage.

What do you think are the student's main strengths?

Fast learner
Good understanding of technical concepts

Are there any areas that you think the student needs to improve?

Not to be too self-critical; whilst it's good to have self-awareness and continually improve and develop, we think Yan should recognise that she is doing a fantastic job overall.

Are there any general comments you wish to make?

Yan should let her manager and team know if there are any areas she is interested in during her placement.
